Gray's Inn
London WC1R 5LX (GB)

(54) Communication method

(57) In a radio communication such as a radio telephone system or the like, there can be set a transmission channel which can cope with a change in a transmission capacity. While a terminal apparatus and a base station are in communication for transmitting a prede-

termined information using a predetermined transmission channel, a signal requesting to set other transmission channel is transmitted using a part of the predetermined transmission channel to initiate communication between the terminal apparatus and the base station through the other transmission channel.

FIG. 2
